Forecast for Sunday 09 May 2021

Weather: Persistent rain will affect eastern areas, mainly the Black Mountains where it will be a wet start to Sunday. The rain will tend to become patchier and lighter through the morning. A mostly cloudy day with the odd sunny spell is expected, with a risk of showers by late afternoon. Remaining cloudy with further showers, perhaps heavy, overnight.

Chance of cloud free mountain/hill tops above 600m: Less than 10% improving to 60% by mid-morning, deteriorating to 40% in the evening.

Visibility: Poor or very poor to start in persistent heavy rain and with cloud bases around 200m covering all summits. Improving through the morning as cloud lifts to 600m by lunchtime. Though deteriorating suddenly in and around showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

It will feel much more pleasant with than of late with brighter, milder and drier daylight conditions, though the ground will be wet following the persistent rain from the past day.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 09 May 2021	63.8mm	64.8mm	64.8mm

Forecast for Monday 10 May 2021

Weather: Sunny spells and scattered, locally heavy or thundery, showers through the day. Generally very windy, particularly in and around heavy showers and on south and western facing hills. Mostly dry with variable cloud cover overnight but remaining breezy and mild.

Maximum wind: South-westerly means 35mph gusts of 45-50mph

Chance of cloud free mountain/hill tops above 600m: 40%

Visibility: Generally very good, though frequently deteriorating in heavy, sometimes longer lived, showers. Scattered cloud with bases of 600-900m will cover hill tops on and off throughout the day.

Temperature: **Valleys:** Plus 12 Celsius.
At 600m: Plus 5 Celsius.
Freezing level: Above hill tops.
